

Senus PLC

AGM Statement

Dublin, Ireland, 8 July 2026, Senus PLC ("Senus" or the "Company"), the Irish headquartered Climate Risk and Soil Health Intelligence technology provider using the most advanced technology stack to measure Natural Capital at scale provides the following update ahead of the Annual General Meeting of the Company ("AGM") which will be held today at 1.00 p.m. (Irish time) at the Company's global headquarters, Senus PLC, Block D, Daneswell Business Centre, Monksland, Athlone, N37 KF30, Ireland.

Addressing shareholders, Chairman, Gerard Keenan will say:

"The Company is pleased to report robust financial performance for the year ended 30 June 2026. Revenue will close at almost €1.0 million equating to solid double-digit year on year growth compared to 2025, reflecting continued customer adoption and conversion of Senus' commercial pipeline. In 2026 our Enterprise channel will have accounted for more than 60% of sales whilst approximately 20% of sales will have been generated from the UK, both key indicators of the Company's strategic progress to higher value customers and larger geographic markets.

June was a record month for Senus ERA with closed sales in excess of €125,000 whilst recent engagement with large agri corporates and financial institutions in Britain and the Nordics as well as Ireland has been hugely encouraging for the broader adoption of Senus ERA. Our sales success and pipeline of prospective clients and contracts, in particular in the Finance and Capital Markets vertical, reinforces the board's confidence to invest in the opportunity for larger, framework deals with large financial institutions.

Alongside our commercial activities, we have focussed on optimising the operational efficiency and financial discipline of the business as we grow. We took the opportunity as part of the integration of Loamin to take out operating costs of close to €0.4 million on an annualised basis. The integration of Loamin has transformed Senus operationally. Whilst the acquisition impacted profitability as anticipated in the current financial year with additional wages, transaction costs and our focus on integration, implementing acquired AI practices and technologies is accelerating development of new customer solutions, driving further innovation and enabling major productivity gains across the organisation which we can capitalise on in 2027.

The board has commenced the recently announced process to identify a new CEO as Brendan Allen transitions to a more strategic role as Vice Chair. Interviews with candidates are commencing without delay. The Company is also seeking to fill the role of Sales Director or Chief Commercial Officer with a global brief and add experience to the Board in line with the Company's growth ambitions.

The Company's cash position at the year end is approximately €0.13 million. Given the scale of the near-term growth opportunity and continued investment required to achieve our medium-term growth objectives, the Company today announces that it shortly intends to launch an equity fundraising. The Board plans to approach existing and new investors with a view to raising €0.5 to €1.5 million. The proceeds of the fundraising will support the addition of key management personnel referenced and support expansion and conversion of a high value pipeline of enterprise customers in Ireland, the UK and further afield over the 2027

financial year. A further announcement relating to the intended fundraise will be made in due course.

Senus is starting the 2027 financial year with a growing addressable market, robust commercial momentum and strengthened foundations from its innovative technology stack and streamlined organisation. The next 12 months are focused on converting demand from financial institutions and agri-corporates into contracted revenue, while expanding Senus' product capability and geographic reach. On behalf of the Board, I would like to thank our shareholders for their ongoing support as we continue to pursue our Senus 2030 growth strategy and deliver our medium term outlook targets."

-ENDS-

Notes to editors:

Founded by Brendan Allen, Eoghan Finneran and Joe Desbonnet in 2017 and headquartered in Ireland, after 8 years of R&D and implementing projects with marquee clients, Senus is now seeking to establish itself as a leading global provider of Climate Risk and Soil Health Intelligence technology solutions to measure Natural Capital at scale for Governments, State agencies, financial institutions, corporations, farmers and other landowners. Natural Capital comprises the world's stock of natural resources including soil, air, water and habitats which underpin economies and society. Senus enables clients to optimise the use and preserve the value of their nature related assets.

Senus' proprietary Climate Risk and Soil Health Intelligence solutions use the most advanced technology stack to enable the 'Measurement', 'Reporting,' 'Verification' and 'Planning' of value chains associated with the use of natural resources in productive industry. Senus' solutions are licenced directly to corporate and government clients, or through intermediaries such as agronomists or other consultants to end users. Senus transforms complex environmental data into actionable insights enabling clients to proactively manage their Natural Capital to unlock productivity gains and reduce environmental and operational risks.

Launched in 2025, the Company's latest solution Senus ERA has substantially expanded the Company's addressable market in the Finance and Capital Markets vertical. Built for financial institutions in addition to other corporates Senus ERA is automating environmental measurement and reporting enabling Senus clients to build insights on risk and resilience within loan books and supply chains. Integrating its AI-driven models will give Senus ERA global applicability and a foundation for accelerated adoption and expansion in international markets over the next 12 months.

Senus is currently providing its solutions to clients in Ireland, increasingly in the UK, and has an initial presence in mainland Europe. For the year ended 30 June 2025, Senus recorded revenue of €836,991, serving 138 customer accounts.
