Senus PLC

Executive Leadership Transition and Notice of Results

Dublin, Ireland, 24 June 2026, Senus PLC ("Senus" or the "Company"), the Irish headquartered provider of Natural Capital management software and technology solutions pioneering geospatial AI for land and soil intelligence today announces that Managing Director, Brendan Allen will transition to the role of Vice Chairman of the Board by October 2026 due to temporary health issues.

The board is immediately commencing a process to interview both internal and external candidates to identify a replacement for Brendan. A Board sub-committee comprising Chairman Gerard Keenan and Non-executive Director Anthony Childs, along with Hugh Sturrock and Brendan has been nominated to expedite matters. The Company will also recruit an experienced Sales Director with a global brief and continue to add experience to the Board in line with the Company's ambition to establish itself as a leading global provider of Natural Capital solutions, supporting growth in the Company's strongly emerging, Finance and Capital Markets vertical.

The Company plans to announce its results for the 12 months ending 30 June 2026 on 11 September 2026.

Gerard Keenan, Chairman of Senus, commented:

Brendan has shown great leadership within Senus as the business transitioned from start-up to scale up over the past few years, culminating in establishing the basis for the creation of a global leader in natural capital management solutions through the investment round, the Loamin acquisition which is proving to be transformational and the Euronext listing in 2025.

The Board and I will work closely to ensure Brendan is able to transition to a non-executive position on the Board with the ability to continue to contribute meaningfully to the strategic direction of the business and ensure continuity for key customer, supplier and other stakeholder relationships, in particular to oversee the penetration of Senus' Natural Capital solution for financial institutions, ERA, around which Brendan has been instrumental in establishing the addressable market and building client relationships.

Notes to editors:

Founded by Brendan Allen, Eoghan Finneran and Joe Desbonnet in 2017 and headquartered in Ireland, after 8 years of R&D and implementing projects with marquee clients, Senus is now seeking to establish itself as a leading global provider of Natural Capital management software and technology solutions for Governments, State agencies, financial institutions, corporations, farmers and other landowners. Natural Capital comprises the world's stock of natural resources including soil, air, water and habitats which underpin economies and society. Senus enables clients to optimise the use and preserve the value of their nature related assets.

Senus' proprietary Natural Capital management software and technology solutions enable the 'Measurement', 'Reporting,' 'Verification' and 'Planning' of value chains associated with the use of natural resources in productive industry. Senus' software and technology solutions are licenced directly to corporate and government clients, or through intermediaries such as agronomists or other consultants to end users. Senus transforms complex environmental data into actionable insights enabling clients to proactively manage their Natural Capital to unlock productivity gains and reduce environmental and operational risks.

Launched in 2025, Senus ERA has substantially expanded the Company's addressable market in the Finance and Capital Markets vertical. Built for financial institutions in addition to other corporates Senus ERA is automating environmental measurement and reporting enabling Senus clients to build insights on risk and resilience within loan books or supply chains. Integrating its AI-driven models will give Senus ERA global applicability and a foundation for accelerated adoption and expansion in international markets over the next 12 months.

Senus is currently providing its solutions to clients in Ireland, increasingly in the UK, and has an initial presence in mainland Europe. For the year ended 30 June 2025, Senus recorded revenue of €836,991, serving 138 customer accounts.
